

iBoot G2S

Easily reboot an external device based on conditions identified by Room Alert.

IBO-G2S-SWI

We've got facilities covered.

Use the iBoot G2S to quickly and easily reboot an external device based on alerts identified by your Room Alert monitor. The compact size lets you use the iBoot G2S in small or remote locations such as closets, kiosks and more. Monitor power status of devices and reboot immediately without the need for a site visit. For more information and specifications, please visit AVTECH.com.
