

# VT825i & VT825ii / Remote Monitoring Unit

Documentation page: <https://vutlan.atlassian.net/wiki/spaces/DEN/pages/2713911301/VT825i+VT825ii+Data+Center+Monitoring+Unit>

Product page: <https://vutlan.com/devices/162-55-vt825i-remote-monitoring-unit.html>

Brochure: product version 1.2

## Function and purpose

The unit is used for environmental monitoring (e.g. temperature, humidity, voltage, leakage, smoke, airflow). It is also used as an I/O controller (e.g. door control, fans, generator, control panels, UPS, circuit breakers, alarms). Can use up to 1000 different elements - notifications, triggers, timers, logic schemes, sensors, dry contacts. Has built-in Web interface with virtual sensors, logic schemes, different types of notification, and control panels. Has a slot for an LTE modem for an ethernet connection reservation.

Two order options:

VT825i has only x1 power inlet.

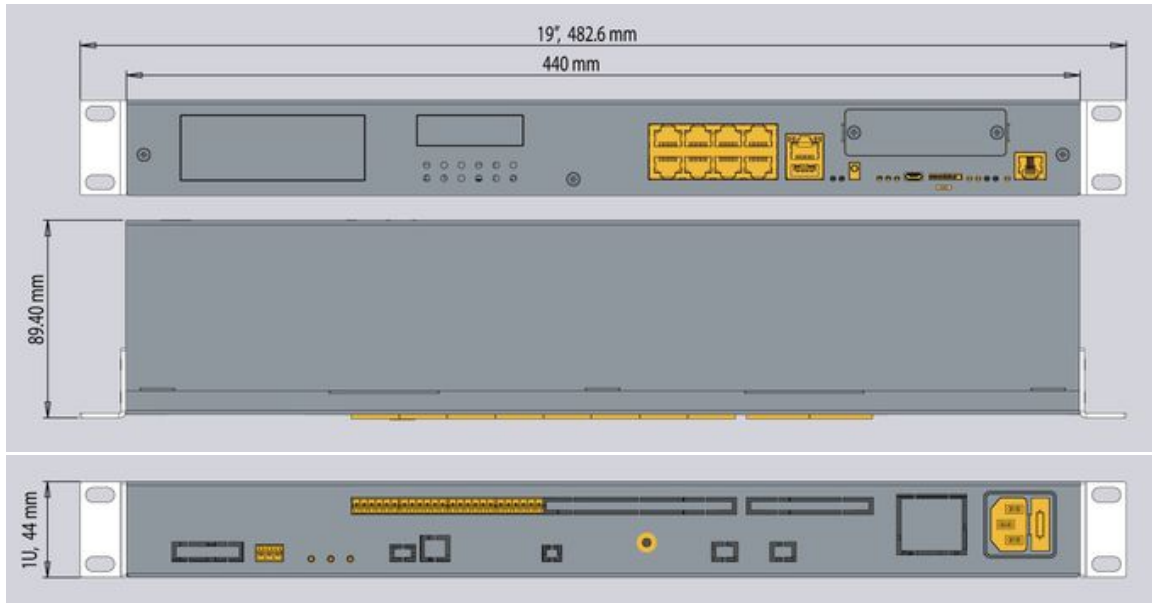

VT825ii has x2 power inlets, providing a redundant power supply for A&B power distribution.

## Order options / Dimensions

System	Description
VT825i	x1 230V AC power inlet.
VT825ii	x2 230V AC power inlets, providing a redundant power supply for A&B power distribution.
VT825iDC	x1 230V AC and x1 24-48V DC power inlets.
VT825DC	x1 24-48V DC power inlet.
VT825DCDC	x2 24-48V DC power inlets.

Physical Description

Front panel:

Back panel:

1. "1U 19 inch brackets" - x2 pcs for mounting brackets into a 1U 19" rack slot.
  2. "Logo sticker" - Displays article number of the monitoring unit.
  3. "Sticker space" - A place for a sticker, can be used by a user to place an identifier of the system (for example, an IP address).
  4. "Analog sensors: A1..A8" - 8 RJ12 analog sensor inputs with auto-sensing. Read instructions at "[Analog sensors connection](#)", "[Sensor configuration](#)".
  5. "LAN port" - Ethernet 10/100 Base-T port, provides an Ethernet connection. Read more in this section "[LAN, GSM, LTE, RADIUS, DNS, SSL, VPN](#)".
    - "Orange LED" - orange LED for Ethernet port. It shows network traffic.
    - "Green LED" - green LED for Ethernet port. It shows network traffic. Flashes green when the system starts up. Shows the connection state (constant green light - the connection is established, blinking green - the connection attempt).
  6. "Modem slot" - "VT790 / LTE slot modem" can be installed in this slot. **This modem is ordered separately.** Read instructions at "[VT790 / LTE slot modem](#)", "[LAN, GSM, LTE, RADIUS, DNS, SSL, VPN](#)".
  7. USB ports are needed for USB camera recording, USB Flash for system logs, and for the system restore. Read instructions at "[Connecting USB camera](#)", "[USB camera settings. How to save a video](#)", "[Saving system logs on USB flash drive](#)", "[USB upgrade or restore of default settings](#)".
    - a. "USB 0" - type micro USB-port 2.0, required to connect a USB camera.
    - b. "USB 1" - type USB-port 2.0, required to connect a USB camera or a USB Flash card.
  8. "SD card" - MicroSD card slot with an ejector. The card is needed for data storage or for the "system restore". Read instructions at "[Saving system logs to SD card](#)", "[Restore of the appliance \(for VT960 series\)](#)".
  - 9a. "CAN DEVICES" - digital connector RJ12 for the connection of CAN sensors/extensions/devices on a CAN bus. Modules can be chained together. Read instructions at "[CAN devices connection](#)", "[Setting up CAN](#)".
    - "LED: CAN" - green LED indicates CAN bus status.
    - The LED blinks slowly - nothing is connected
    - The LED blinks fast - configuration is in process
    - The LED glows constantly - connected to CAN devices
  11. "TEMPERATURE SENSOR" - accuracy +/- 1 °C.
  12. "LED: ACT" - green LED indicates appliance system status,
    - - operating mode of the device: switches at a frequency of 2 times per second;
    - - successful completion of the software update process: switches at a frequency of 4 times per second;
- "LED: ALARM" - The button can be programmed from the interface for alarm indicating.
- "LED: ERR" - red LED indicates error and traffic.
- the operating mode of the device: If everything is normal, the LED is extinguished, if not - there's a constant glow;

- software update mode: switches at a rate of 2 times per second;

### 13. "Dip switch"

- Normal mode: The switch is switched to the left . The switch should be always in this position.
- Recovery mode: The switch is switched to the right . Use this option only in case you need to recover manufacturing settings.

### 14a. "OUTPUTS 12V 0.25A" - 12V 0.25A (for each output) terminals outputs (electronic relay). Read instructions at "[Connecting 12V devices to 12V outputs](#)".

- "LEDs: E1, E2" - status indicators for two 12V 0.25A outputs.
- The LED is ON (orange) - the output is ON (the initial state can be configured).
- The LED is OFF (orange) - the output is OFF ((the initial state can be configured).

### 16. "DRY CONTACT INPUTS 1...16" - Digital inputs (Type IN). Read instructions at "[Connecting dry contacts](#)", "[Dry contacts settings](#)".

### 19. Please refer to section "Order options" in this document.

- 18. "RESERVE" - Reserve power inlet. 100-240VAC, 50/60Hz, Fuse 2A, Fuse 5x20mm, type C14.
- 19. "MAIN" - Power inlet. 100-240VAC, 50/60Hz, Fuse 2A, Fuse 5x20mm, type C14.

### 20. Buttons

- 9a. "Restart" - the button restarts the appliance. Hold the button for 2 seconds and then let go, the system will restart.
- 9b. "Reset settings" - reset smoke sensors. Read more at [Operation of smoke detectors in dusty conditions](#).
- 9b. "Factory reset" - reset settings to default factory settings.

### 22. "DC 12V BACKUP POWER" - optional order option. Only available for custom orders.

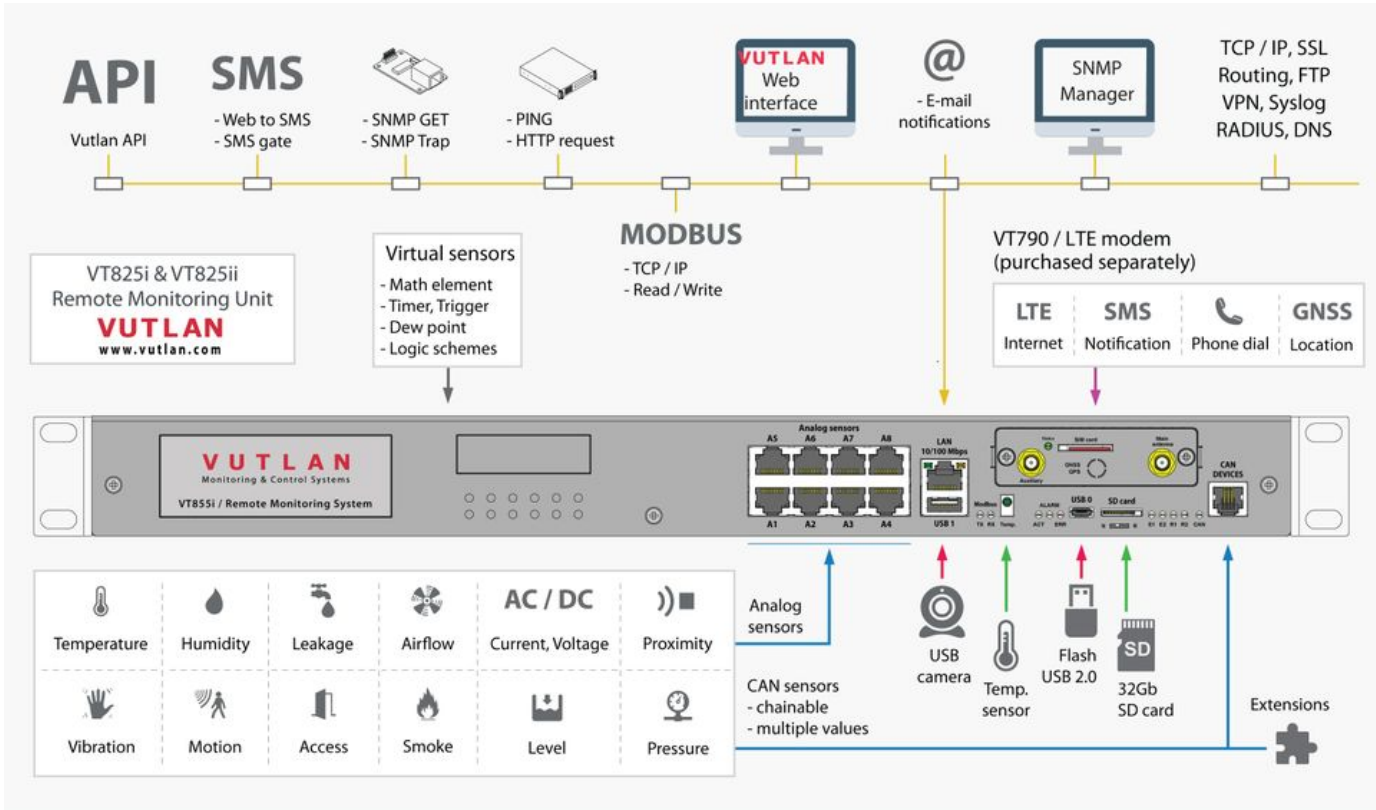

### 23. "Chassis grounding" - Chassis grounding, M4 thread. Enhances the immunity of the equipment against conducted and radiated RF disturbances. Please contact a professional electrician before connecting it.

### 24. "POWER 24-48V DC" - optional order option for some of the units. Please refer to section "Order options" in this document.

- 24a. "RESERVE" - Reserve power inlet. 24-48V DC, 5.08mm 2EDGK power plug, 18-72VDC to 12VDC/0.84A
- 24b. "MAIN" - Power inlet. 24-48V DC, 5.08mm 2EDGK power plug, 18-72VDC to 12VDC/0.84A

## Connection overview diagram

The front panel of **VT825i & VT825ii**:

The back panel of VT825ii:

Drawing dimensions

Installing the device into a 19" rack

Use x3 pcs of supplied screws (M3 6mm) for each bracket to fix it on each side of the enclosure as shown in the picture below. The screws and brackets are supplied with the unit.

## Installing LTE slot modem

Product page: <https://vutlan.com/modems/155-vt790-lte-slot-modem.html>

Datasheet page: <https://vutlan.atlassian.net/wiki/spaces/DEN/pages/2309947438/VT790+LTE+modem>

## Usage

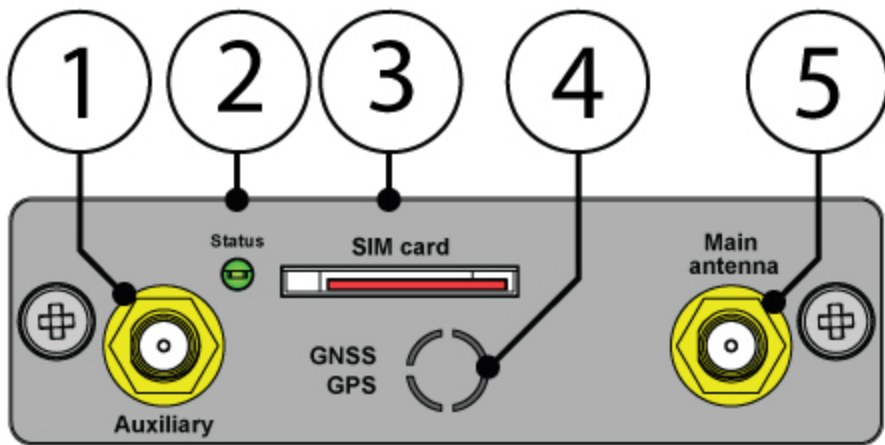

Can be installed in VT855i v1.2, VT855ii v1.2, VT825i v1.2, VT825ii v1.2, VT960i v2, VT960ii v2 monitoring systems. (These new systems are coming soon).

**i** VT825i v2.6, VT825ii v2.6, VT855i v2.6, VT855ii v2.6, VT960 v3 use VT740 LTE slot modem.

## Description

4G LTE slot modem for Vutlan monitoring units. Allows to receive and send SMS messages. Provides Ethernet over 4G LTE. Power-cycling is an embedded function.

## Panel

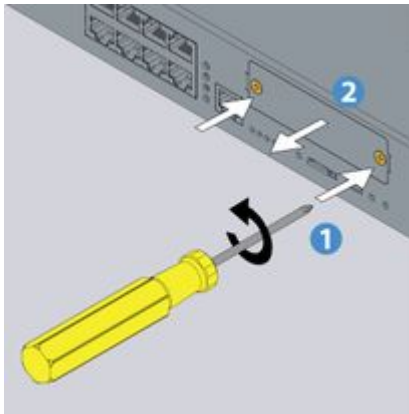

1. "**Auxiliary**" - Connector, used when the modem is installed inside of the appliance to connect LTE auxiliary antenna. The additional antenna helps to strengthen the signal level. (Auxiliary LTE antenna and antenna output are ordered separately from the modem).
2. "**Status**" - displays modems status. Blinking = working.
3. "**SIM card**" - SIM card slot with an injector.
4. "**antenna**" - Connector, used when the modem is installed inside of the appliance to connect GNSS antenna
5. "**Main antenna**" - Connector, used when the modem is installed inside of the appliance to connect GSM or LTE main antenna. (The main antenna is supplied together with the modem).

### Installation

You can install the modem while the system is turned On. You may wait up to 3 minutes until the Telecom operator information is renewed.

Step 1

1.1 Unscrew the two screws holding the front panel called "**Modem slot**". Keep the screws, you will need them in Step 3.

1.2 Take the panel out and put it away.

<p>Step 2</p>		<p>Plug the modem as shown on the picture into the opening. The board should slide into the guide rails (marked as "1") and plug into the jack (marked as "2").</p>
<p>Step 3</p>		<p>3.1 Use the screws we unscrewed earlier and screw them in clockwise, securing the new modem in place.</p> <p>3.2 Plug in the SIM card. The SIM card slot has an injector.</p>
<p>Step 4</p>		<p>4.1 Screw the main LTE antenna into "Main" antenna" jack.</p> <p>4.2 If you want to strengthen the signal, you can plug the second auxiliary antenna into "Auxiliary" jack.</p>
<p>Step 5</p>		<p>You are ready to go! Turn on the system.</p>

If you want to unmount the modem, you can unscrew the screws and just pull it out using x2 gold-plated antenna jacks.

Configuring the modem

Please read the following section for the configuration instructions:

Online documentation page link: [Setting up a modem](#)

The direct page link for users with paper documentation:

<https://vutlan.atlassian.net/wiki/spaces/DEN/pages/1016347/Setting+up+a+modem>

### Inventory

Make sure that the contents of the delivery meet the following configuration. Report a missing or damaged component to your supplier. If damage occurred during transportation, contact the appropriate delivery service.

	Package content	Description	Quantity				
			VT825i	VT825ii	VT825iDC	VT825DC	VT825DCDC
1		Monitoring unit VT825i.	1 pc				
2		OTG Micro USB cable adater	1 pc				
3		RJ-45 3m patch cable. For LAN Ethernet connection.	1 pc				

4		Self-adhesive rubber foot	4 pcs
5		19" rack brackets	2 pcs
6		M3 x 8mm Phillips flat-head screws	6 pcs
7		Configuration manual	1 pc

8		Warranty card	1 pc				
9		Terminal plug 3 pins, 3.81 mm. For 12V relays (E1 & E2).	1 pcs				
10		Terminal plug 6 pins, 3.5 mm. For connecting dry contact inputs.	4 pcs				
			VT825I	VT825II	VT825IDC	VT825DC	VT825DCDC
11		Terminal plug 2 pins, 5.08mm, 2P. For power input 24-48VDC.	-	-	1 pc	1 pc	2 pc

12		EU Schuko C13 0.75 mm <sup>2</sup> . 230V 10A cable.	1 pc	2 pc	1 pc	-	-

## Technical details

VT325, VT335i, VT336, VT825i, VT825ii, VT855i, VT855ii, VT960i, VT960ii are the monitoring units and can not connect to each other. For scalability please use extension units and embedded boards. All units except produced in DC / DC version.

- Built-in
- None
- Extension possible
- ◇ Not extendable
